### **LX-1377 Fuel Transfer Pump Kit**

#### *Heavy-Duty 12V Pump Kit*

**Fort Mill, SC** - The Lumax LX-1377 is a heavy duty, industrial grade fuel transfer pump. This pump is ideal for pumping oil or petroleum-based products such as gasoline, diesel, kerosene, and mineral spirits. It has a highly-efficient vane design that provides faster priming, better performance, and longer life. Built from heavy-duty cast iron for durability, it is designed to reduce wear and to keep working over a long period of time. It has an explosion proof motor. It is a CSA certified pump unit, and it comes with a UL listed nozzle. It has a strainer and a by-pass valve built in to prevent damage to the pump and equipment. The pump is designed for tank and barrel mounting applications. The continuous cycle of the LX-1377 is 30 minutes.

The flow rate for the LX-1377 is 15 gallons per minute (57L/minute). The pump has a working pressure of 18 psi (1.2 bar). The pump's voltage is 12V, 20 amps. The power cord for the LX-1377 is 16 ft. The pump kits includes the pump, automatic shut-off fuel nozzle, lockable nozzle holder, 41"x 1" steel telescoping suction pipe, 13 ft. x 3/4" anti-static wire discharge hose, and 2" threading bung adapter for barrel or tank mount.
