Our End of Year Edition

Our End Of Year Edition: Seasons Greetings

It's the time of year when many of us are wrapping presents. As we wrap up our final newsletter of the year we reflect on the significant trends and issues that manufacturing and industry have faced in 2023; cyber security, supply chain resilience, sustainability, the impacts of extreme weather, reshoring and of course artificial intelligence (AI), to name just a few. This newsletter reflects on what 2024 might hold with AI, Industry 4.0, sustainability and global partnerships having an impact next year. We look forward to continuing to highlight success stories throughout manufacturing and industry and delivering exceptional value to both our clients and our readership in the New Year.

Wishing Everyone a Happy and Healthy Holiday Season and a Peaceful and Prosperous New Year.

Susan Poeton and the Team at Industry Today
