

Learn how 750 quality pros feel about the state of quality, quality management systems, recalls, supplier quality and AI.

In early 2024, ETQ surveyed 750 quality pros in the U.S. and Europe on their views on the current state of quality in their organizations. The goal was to discover the trends, issues and challenges they face daily. The results were enlightening...and surprising.

Survey respondents came from a range of industries including electronics/appliances, medical devices, pharma/life science, food & beverage, automotive, aerospace/defense and heavy manufacturing.

- 73% of respondents had a product recall in the last five years and 48% said recalls were up from five years ago.
- 52% of respondents claim that up to one-half of product recalls can be attributed to supplier issues.
- 47% of respondents plan on using AI in the next 2 years.

Don't miss this opportunity to learn about the current pulse of quality in manufacturing.
