Industry Today's Digital Magazine Live

Welcome to the final edition of Industry Today's manufacturing news for 2024. This is typically the time of year when people are making resolutions, and sometimes even keeping them. We at Industry Today remain resolute in bringing you pertinent news and information from key decision makers and influencers about manufacturing and industry. It's a resolution we have kept for nearly 30 years.

We hope you enjoy the latest [digital issue](#) of Industry Today that features profiles on leading manufacturing and industrial companies as well as the Association of Equipment Manufacturers, who over the summer embarked on a [nationwide tour](#) designed to shine a spotlight on the U.S. equipment manufacturing industry and the 2.3 million workers who drive it; articles on [Invest Buffalo Niagara](#) and the [Oklahoma Manufacturing Alliance](#); [research](#) that reveals most automotive manufacturers are lacking the critical skills needed to successfully transition to electric vehicles and [America in Motion](#), an innovator that builds all-in-one materials handling solutions deploying custom-built Automated Guided Vehicles (AGVs). Finally tune into our last [podcast](#) for the year with Chris Brown, Vice President of Sales at CADDi, a leading manufacturing solutions provider.

Manufacturing News

AEM Manufacturing Express: Celebrating the Backbone of America

Get on the bus with the Association of Equipment Manufacturers (AEM) and its AEM Manufacturing Express, a nationwide tour designed to promote the U.S. equipment manufacturing industry and its 2.3 million workers. Over the course of 18 weeks, the Express crisscrossed 13,500 miles, stopping at over 80 manufacturing facilities across 20 states and connecting with nearly 100 elected officials and engaging over 9,000 employees.

Mobile Automation is the Future

Tech is also driving innovations in warehousing operations. Senior Editor David Soyka profiles America in Motion, which designs and builds all-in-one materials handling solutions deploying custom-built Automated Guided Vehicles (AGVs). These mobile robots can carry payloads ranging from several pounds to several tons and navigate independently within a facility.

The Success and Resilience of Oklahoma Manufacturing

Oklahoma is home to over 4,200 manufacturing businesses and nearly 130,000 workers, a crucial part of the state's economic fabric, shaping the lives and livelihoods of Oklahomans while contributing significantly to the nation's industrial output. In recent years, Oklahoma's manufacturing industry has not only survived global challenges but has thrived by leveraging innovation, skilled labor, and a strong network of local support.

How to Get to Cruising Speed in the Race to the EV Future

Research shows that automotive manufacturers need to urgently invest in building a workforce equipped not only for traditional 'metal-bashing' production but also for advanced manufacturing models such as automated manufacturing, innovative product development, and direct-to-consumer sales.
