Murky Economic Outlook

All eyes were on the economy as the [2025 World Economic Forum](#) began on Monday, January 20. The latest [Chief Economists Outlook](#) from the World Economic Forum is not overly optimistic. More than half of surveyed economists (56%) expect weakened economic conditions in 2025. While the U.S. appears in a good position, with 44% of chief economists predicting strong growth in 2025, the outlook is less optimistic for other major economies.
