

From STEM to Skilled Trades: Supporting the Future of Manufacturing

Last week as we celebrated Manufacturing Day 2025, Industry Today's latest digital magazine highlights the organizations and initiatives building a stronger future for U.S. manufacturing. In this issue, we feature efforts that inspire and prepare the next generation - from Discovery Education's STEM culture programs, to [Genentech's](#) commitment to biotech innovation, to the [PHCC Educational Foundation's](#) dedication to skilled trades. Alongside these workforce initiatives, we also spotlight [Moser on Manufacturing's Reshoring Initiative](#), which has tracked reshoring and foreign direct investment cases since 2010 and now offers a roadmap to accelerate the return of manufacturing jobs to U.S. soil. Together, these stories reflect a shared mission: strengthening America's manufacturing workforce and supply chains for generations to come.

Explore our company features and Economic Development series below to see how regions and organizations nationwide are fueling growth, innovation, and opportunity.
