

Use this handy Buyers' Guide to make smarter, safer decisions when choosing a Secure Remote Access (SRA) solution for your OT environment

Any security tool that causes downtime, adds complexity, or requires a cloud connection is not a good fit when you're operating critical infrastructure.

In this guide, you'll discover 8 key questions to help you evaluate SRA solutions and determine whether they can meet both the security and operational needs of always-on Energy & Utilities facilities.

Question 1: Will it work in any environment, including offline?

Question 2: Can you deploy it without infrastructure changes or downtime?

Download the full guide now to see all 8 questions, plus gain additional insights to help you pick an SRA solution that will maximize both security and uptime in your OT environment.
